Soundness: consistency with national policy.

Policy CC8 is another policy that is in itself welcome, but could be strengthened, to be fully consistent with NPPF (Dec 2023) especially para 167c. Again (as with CC7) there is wording in Policy CC1 that would be better placed in CC8. CC1 is about achieving net zero, yet CC1g talks about using SUDS and other nature-based solutions to deliver flood management, issues that would seem more appropriate for policies that are concerned with adapting to climate change rather than mitigating it. Policy CC8 does in fact include a requirement for SUDs, but the policy should be extended to cover other nature based solutions ‘...*natural flood management techniques*...’ in the words of NPPF.

5 (c). Please set out the modification(s) you consider necessary to make this part of the Exeter Plan sound, in respect of any soundness matters you have identified at 5(b) above.

You will need to say why each modification will make this part of the Exeter Plan sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.

Modification, in order to comply with NPPF (Dec 2023) para 167c:

Include a requirement for development proposals to use nature-based solutions to deliver flood risk management unless there is clear evidence that this would be inappropriate.
