The RSPB supports the statement in para 10.16 that “Proposals that have a likely significant effect on internationally important sites (currently comprising Special Areas Of Conservation, Special Protection Areas (SPA) and Ramsar sites) will be subject to an appropriate assessment in accordance with the Habitats Regulations. Where the assessment indicates that it is not possible to ascertain that the proposal, either on its own or in combination with other plans or projects, would have no adverse effect on the integrity of the site, development will only be permitted in exceptional circumstances where there are no alternative solutions, there is an imperative overriding public interest and compensation measures are secured.”

However, we are very concerned that the amount of new residential development proposed within 10km of the Exe Estuary SPA/Ramsar and east Devon heaths SPA/SAC within this Exeter Plan **combined with that in the emerging East Devon Local Plan** will result in adverse impacts on those sites (eg increased recreational pressure) that cannot be satisfactorily mitigated or compensated for. The HRA for the emerging East Devon Local Plan has not been finalised and, while we note that the HRA for the Exeter Plan (Footprint Ecology, 9 December 2024) concluded the strategic mitigation strategy (Teignbridge District Council, Exeter City Council and East Devon District

Council) contains measures sufficient to mitigate/compensate sufficiently for the increased recreational impacts arising from proposed new residential and tourism developments in Exeter, (eg, financial contributions from developers of those new developments within 10km of the designated sites for mitigations measures such as wardening on those sites, and managing the Valley Parks to maximise accommodation of local recreational needs), we are concerned that, combined with the proposals for new residential developments in East Devon that are much, much closer to the designated heathlands, existing strategic measures may not be sufficient to avoid adverse impacts on the designated heathlands.

Please note In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.
