5.8 sets out a range of renewable energy sources which includes wind generation but there is no discussion about wind turbines in section 5 for Climate Change. The Objective states: **Make the fullest possible contribution to the mitigation of, and adaptation to, climate change working towards a net zero carbon city**, so it is surprising that there is no policy for wind turbines – ECS thinks there should be. Both policies CC1 (Net zero Exeter- strategic policy) and CC2 (Renewable and low carbon energy – strategic policy) have wording which would support wind turbine provision.

In paragraph 5.11 it says it is vital that there is an increase of renewables, and cites the NPPF that all communities should contribute to renewable energy generation. Furthermore, the current government is now encouraging land based wind turbines.

Whilst wind turbines may not be suitable in residential areas (except of a domestic scale) they can be located on industrial estates and on some green spaces – as has been achieved in the Avonmouth docks area near Bristol.

Not setting criteria within the plan could result in proposals coming forward for which the planning authority will be unprepared for, and residents and businesses will have no criteria to help understand whether proposals are reasonable.

5 (c). Please set out the modification(s) you consider necessary to make this part of the Exeter Plan sound, in respect of any soundness matters you have identified at 5(b) above.

You will need to say why each modification will make this part of the Exeter Plan sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.
